Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 9-13, 15, 17 and 19-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Swapp.

There is disclosed in Swapp an embossing roller comprising: a cover/handle assembly 7, 9, 65 with multiple hand placement possibilities, the cover/handle further comprising an attachment 8 for an embossing wheel, the embossing wheel comprising a cylinder 2, the cover/handle member draping over the embossing wheel (when so positioned by the user) and attaching to the embossing wheel at a center-rotating axis 55, 56 of the wheel, the embossing wheel comprising an embossing pattern 28, 29 oriented on a rolling surface of the wheel, the embossing pattern assembly able to be changed for different embossing patterns and is height adjustable, the cover/handle further comprises an attachment 33 for a coloring device 30, wherein the roller further comprises an orienting mark 61 that indicates a starting point of the embossing pattern.

In regards to the use of the device with a food product, such is intended use and provides no structural limitations to the claims.

In regards to claim 22, the method at which the embossing pattern is placed upon the wheel is not germane to the issue of patentability of the device itself. Therefore, this limitation has not been given patentable weight.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 16 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swapp in view of Kuzyk.

Kuzyk discloses a cutting blade along with a roller device. It would have been obvious to one skilled in the art to provide the device of Swapp with the cutting blade of Kuzyk, in order to cut the surface which is being embossed.

***Allowable Subject Matter***

Claims 25 and 26 are allowed.

Claim 24 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

Applicant's arguments filed 25 November 2006 have been fully considered but they are not persuasive. Applicant at no place in the specification has disclosed the

Art Unit: 1761

device as anything other than for use with a food product. It has been disclosed as being a combination of elements including a food product. The attempt at amending the claim to recite a combination has fallen short and appears to only disclose the device as for use with a food product. Such a use is viewed as intended only and provides no additional structural limitations to the claims.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
